

Project #2

Stephanos Kung Fu Club

Team Members:

Madhusudhan Reddy Sangam (Team Representative)	104496385
Vidya Sagar Veeramallu	104624108
Sai Kiran Jakka	104646416
Smriti Bahl	104664001

How to run?

To run the project, you need to have Visual Studio 2013 or more and MS SQL Server Management Studio. When getting into the index page, if you give invalid credentials, it asks for the right username and password. After logging in, you have the options to insert student's details, update student's details, attendance marking option and payment updating. When inserting a student who has below 18 years, parental details are being asked. The attendance can be marked if the student appears for a class. When the student makes a payment, his payment details can be saved. Also, we can check the reports of payment. All these are shown in the video that is being attached.

Username & Password:

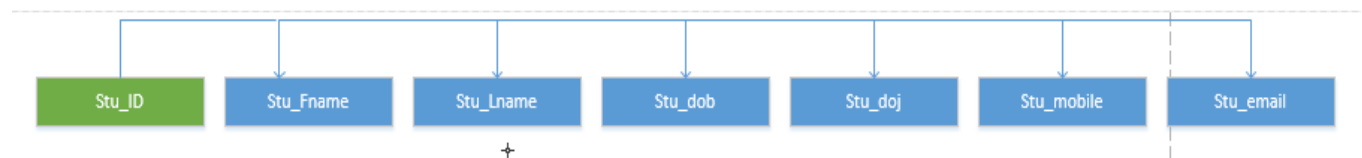

To use this application, login is needed. The credentials are:

Username: stephanos

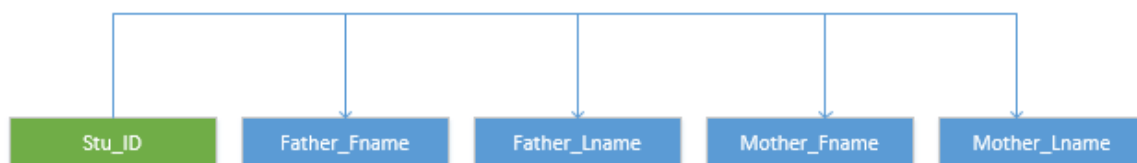

Password: project123
